 <p>Geometrische Teilung einer Länge a nach dem Goldenen Schnitts</p> <p>The diagram shows a human figure inscribed within a square and a circle. The figure's arms and legs are extended to touch the square and circle. A grid is overlaid on the figure, with vertical lines corresponding to the figure's proportions. A smaller diagram in the bottom-left corner illustrates the geometric construction of the Golden Section, showing a vertical line of length 'a' being divided into segments 'x' and 'a-x' such that $a/x = x/(a-x)$. The letters 'Σ', 'a', and 'E' are labeled on the vertical line.</p>
